Burpee Bulbs

for
**FALL
PLANTING**

Flower Seeds, Lawn Grass Seed and Vegetable Roots

Plant Burpee's American Grown Bulbs this fall for beautiful flowers indoors this winter or outdoors next spring. This book offers a choice assortment of varieties, all of which, with the exception of a few Lilies, have been grown here in this country.

It is easy to grow flowers from Burpee Bulbs. With each class, we give short cultural directions; on the bags containing the bulbs is printed complete information. We suggest you order your requirements soon, for the supply of some is limited.

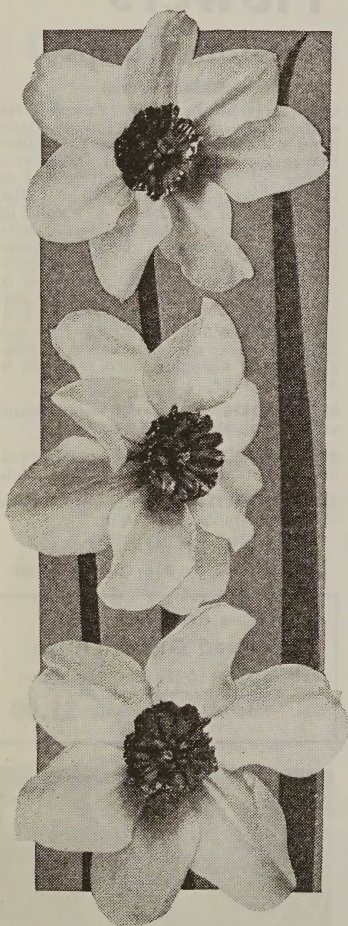

Biennial and perennial flower seeds may be sown during the summer to furnish blooming plants for the following year. Sweet Pea seeds sown in the fall produce earlier and freer blooming plants than spring sowings; this is also true of some annuals, such as Larkspurs, Cornflowers and California Poppies. In this little book we offer a choice selection of all these seeds along with Lawn Grass seed and vegetable roots. Your orders, large or small, are assured of our best attention. You can rely on Burpee for the Best Seeds and Bulbs that grow.

ORDER EARLY Bulbs ordered before they are ready to send out will be booked for delivery and orders filled, in rotation as received, as quickly as possible after the bulbs reach us from our growers. *All bulbs, with just a few exceptions, are ready for delivery after the middle of September,* and all hardy varieties can be planted outdoors any time from then on until the ground freezes hard. Daffodils, however, will do better if planted before the ground freezes.

FREE DELIVERY Everything offered in this catalog will be delivered anywhere in the U.S. or its possessions by parcel post or express prepaid at the prices quoted, except large quantities of vegetable roots listed "not prepaid."

BURPEE GUARANTEE We guarantee the vitality and purity of Burpee's Seeds and Bulbs to the full amount of the purchase price. Even with the highest quality seeds and bulbs, success in gardening depends largely upon cultivation, soil, and weather conditions. Therefore, in no case shall W. Atlee Burpee Co. be liable for more than the amount actually paid us for seeds or bulbs. All goods listed in this book are sold under this guarantee; they must produce satisfactory results or your money will be refunded.

Plant bulbs 3 to 4 in. apart and 2 to 3 in. deep. Perfectly hardy; may be left undisturbed for years.

Mariposa Tulips

(Calochortus)

(Shown in color on second cover.)

"Mariposa" means **butterfly** in Spanish, and is applied to these Tulips because the "eyes" and markings on the gorgeously colored flowers are so much like those on the wings of a butterfly. Flowers are cup-shaped and of wonderful colors, many marked with dots and pencillings. They are borne one or more to a stem during May and June. Bulbs are small and should be planted 2½ to 3 in. deep and 3 to 6 in. apart. In cold sections give bed a surface covering of several inches of straw or strawy manure after the ground has become frozen.

9382 Clavatus The bowl-shaped blooms, often over 4 in. across, are deep golden yellow without markings, the lower half being covered with stiff yellow hairs. The largest flowered, stoutest stemmed Mariposa Tulip.
3 for 40¢; 12 for \$1.40; 100 for \$10.00.

9384 Luteus Lemon-yellow to cream and white; finely penciled.

9386 Splendens Clear, unspotted lavender; one of the prettiest.

9388 Venustus Lilac to purple; all are marked, penciled, and spotted.

Any of the above except Clavatus:

3 for 25¢; 12 for 80¢; 100 for \$5.75.

9389 Mixed Colors All the above and other gorgeous varieties in mixture. Makes a showy display.
3 for 25¢; 12 for 70¢; 100 for \$5.00.

9822 COLLECTION

4 named Mariposa Tulips

24 Bulbs (6 each of the above 4 separate varieties, value \$1.90) for only **\$1.50**

Ixias (African Corn Lily)

9091 Mixed Colors Beautiful little plants of easy culture, about 1 ft. high. Long, slender, graceful spikes of blooms in shades of yellow, white, pink, scarlet and crimson, the center always differing in color from the outer parts. The effect is most striking. Plant bulbs 3 in. deep, 4 to 6 in. apart, and in cold sections provide winter protection. Not recommended for outdoor culture in very cold sections. Fine for indoor pot-growing.

12 for 45¢; 100 for \$3.00.

Globe Tulips

(Calochortus)

Often referred to as Fairy Lanterns; the shape of the flowers and the way they hang on the stem suggest the name. Plants are much branched and bear a number of exquisitely tinted flowers on long, leaf-wrapped stems. Globe Tulips are natives of woodlands, so should be planted in any friable soil mixed with plenty of leaf mold. They like some shade but not full shade. Fine subjects to naturalize in the rock garden or in shaded woods, but they must have perfect drainage. Plant bulbs 2½ to 3 in. deep and 3 to 6 in. apart. In cold sections, provide winter protection after ground has become frozen. Bloom in May and June.

9376 Albus White with some bronze and pinkish tinging. 18 to 30 in.

9377 Amabilis Bright canary yellow, a popular color. Up to 15 in. high.

9378 Amoenus A delightful shade of soft rose-pink. 8 to 16 in.

Any of the above Globe Tulips:

Dog's Tooth Violet, Mixed
3 for 25¢; 12 for 75¢; 100 for \$5.25.

Dog's Tooth Violet

(*Erythronium*)

(Shown in color on second cover.)

9089 Mixed, All Sorts Beautiful little plants, 6 to 7 in. high, with small, Lily-like, nodding flowers in delicate tints of white, pink, cream, lavender, bright yellow and rose. Leaves are often prettily mottled. The shape of the roots gives them the common name of *Dog's Tooth Violets*, while the mottling of some leaves gives them also the name of *Trout Lilies*. Particularly suited for woodlands, shaded corners or crevices of the rockery. Bloom in April. Plant bulbs upright as soon as received, 3 in. apart and 2 to 3 in. deep. Do best in well-drained, loamy or gritty soil, moist and rich in leaf-mold. Provide a covering of 4 to 6 inches of half-rotted leaves after bulbs are planted. 3 for 25¢; 12 for 75¢; 100 for \$5.25.

Snowflakes (Leucojum)
3 for 25¢; 12 for 70¢.

Snowflakes

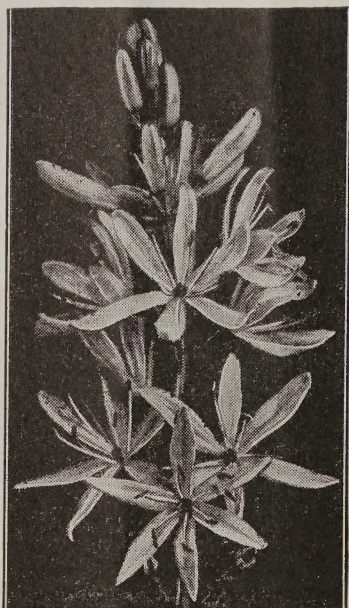

(*Leucojum aestivum*)

(Shown in color on second cover.)

9498 Dainty, white, bell-shaped, pendent flowers attractively tipped with green; somewhat like a mammoth Snowdrop, on long, slender stems 12 to 14 in. high. Begin blooming in early May; excellent for naturalizing in the mixed border, among shrubbery or in the rock garden. Plant bulbs 4 to 5 in. deep, 6 to 8 in. apart. If planted where bulbs can be left undisturbed for many years, they will increase into large clumps which become more beautiful each spring. May be used for cutting. They do best in a deep, rich, moderately moist soil and semi-shade.

3 for 25¢; 12 for 70¢; 100 for \$5.00.

Bulbs listed in this catalog must be planted in the fall. They cannot be had, except for a few, at any other time of the year.

Camassia Leichtlini
3 for 30¢; 12 for \$1.00.

Camassia

(*Indian Lily*)

9381 Leichtlini Do well under ordinary garden culture. Excellent for naturalizing in open, moist locations. May be left undisturbed for years. Hardy without protection. Blooms in late May and June. The flower-spikes grow 2 to 3 ft. high, and bear many star-shaped flowers 1½ in. across in shades of blue, ranging from lavender-blue to deep purplish blue. Plant bulbs in masses, 4 in. deep and 4 to 5 in. apart, for best effect.

3 for 30¢; 12 for \$1.00; 100 for \$7.50.

Ranunculus

8977 Tecolote Giants The largest and most magnificent strain ever offered. Giant double and semi-double flowers, 3 in. and more across, are freely borne on strong stems, 12 to 15 in. long. Our mixture contains a wonderful range of colors—yellows, from straw through all shades to deep golden yellow; reds, including dark crimson, scarlet, orange-red and all other shades of red; orange, pink, many ringed and tipped with a deeper color—in fact, every desired color is included. Do best in a shady location and in moderately rich soil. Fine for cutting. Not reliably hardy north of Washington, D. C., except in warm, sheltered locations. Splendid for growing in frames or pots. The roots resemble tiny clumps of Dahlias. Set them, claws downward, 2 in. deep and 4 to 6 in. apart. If grown in pots, plant 6 to 8 roots in a 6-inch pot; cover roots with one inch of soil, and allow 2 inches of space between bulbs. 3 for 15¢; 12 for 55¢; 100 for \$3.75.

Brodiaea

Brodiaea, Mixed Colors
3 for 25¢; 12 for 70¢; 100 for \$4.75.

9497 Mixed Colors Neat plants with grassy basal leaves from which arise very slender stems bearing heads of showy little star-shaped waxy blooms in yellow, white, blue, lilac and purple. Grow 15 to 20 in. high and bloom during May and June. Easily grown in almost any soil, but prefer one that is light and porous, well drained and of a sandy or loamy nature. They delight in semi-shade and are lovely for the rock garden and do well under oak and deciduous trees. Plant bulbs 2 to 3 in. deep and protect in cold sections with several inches of straw or strawy manure after the ground has become frozen. May also be grown indoors in pots. 3 for 25¢; 12 for 70¢; 100 for \$4.75.

Ranunculus, Tecolote Giants
(Shown in color on second cover.)
3 for 15¢; 12 for 55¢; 100 for \$3.75.

BULBOUS IRIS

A glorious display of blue, white, bronze, and yellow flowers in June if you plant the bulbs of these beautiful Iris early in the fall. Flowers are suggestive of Orchids. Bulbs, for best results, should be planted early (September or October) in well-drained, sandy loam, 3 to 4 in. deep and 6 in. apart. In cold climates, mulch ground well after it is frozen. It is their nature to root early and often make top growth in December.

Dutch Iris Flowers are larger, broader, and the falls usually wider apart than the Spanish type; they come into bloom one to two weeks earlier. Beautiful in the garden; lovely for cutting. Valuable for greenhouse forcing.

Giant Triumph Tulips

A rather new group of Tulips with large, well-formed, Darwin-like flowers on tall, strong stems. They come into bloom just ahead of the Darwins, thereby providing a longer display of Tulips in the garden. This is of considerable value, especially this year, when we cannot supply any of the Early Single Tulips. In addition, colors and color combinations are seen in Triumph Tulips that are not seen in other classes. While Triumph Tulips may be forced, we do not recommend them for house culture. Often referred to as "Early Darwins."

Botanical Tulips

The Botanical and wild Tulip species are mostly natives of Central Asia and are quite different in habit, requirements and uses from all other Tulips. Their popularity is increasing each year, as they surely have a grace and charm that endear them to everyone. Plant in a sunny location and well-drained soil. They deserve a place in every rock garden and hardy border, as they bloom in April and early May, ahead of other Tulips.

Rembrandt Tulip

9350 Australis An April-flowering type with sweetly scented small nodding yellow flowers flushed red on the outside of the petals. From Algeria. 10 in. tall. 3 for 40¢; 12 for \$1.25; 100 for \$9.00.

9393 Eichleri Fairly large crimson-scarlet flowers; outer petals marked brown. Base is glistening black bordered with gold. A grand Tulip from Turkestan. Blooms in early April. 12 in. tall. 3 for 30¢; 12 for \$1.00; 100 for \$7.50.

9396 Marjoletti Primrose-yellow shaded carmine-red; green starred base. A lovely species from Savoy usually flowering in early May. 14 in. 3 for 40¢; 12 for \$1.40; 100 for \$10.00.

Rembrandt Tulips

9333 MIXED COLORS The flowers of Rembrandt Tulips resemble those of the Darwins, but instead of being of solid colors, they are beautifully striped, feathered or flaked in two or more colors. They bloom in May, grow 18 to 22 in. high, and are sometimes referred to as "Striped Darwins." We offer a splendid mixture of many varieties of this artistic and striking class of Tulips. 3 for 30¢; 12 for 95¢; 100 for \$7.00.

Tall Giant Darwin Tulips

The chief characteristics of Darwin Tulips are the perfect cup-shaped flowers, fleshy petals, tall stems, and lovely colors—scarlet, crimson, rose, pink, violet, purple, slaty blues, blue-violet, lavender, white and golden yellow. They are wonderful for planting in masses in beds or borders, in clumps of 12 or more here and there in the hardy perennial border, or in the foreground of shrubbery, and what could be lovelier for cutting?

For a full range of colors in late Tulips, the Darwin, Breeder and Cottage varieties should be included in your plantings, as each class has its own range of colors, and all three bloom at approximately the same time. The Triumph Tulips, listed on page 5, bloom a little earlier than the Darwins or other late Tulips. The height given for each variety is average, and some variation is natural in different localities and seasons.

Giant Breeder Tulips

Breeder Tulips are of the same tall, stately growth as the Darwins, require the same culture, bloom at about the same time (during the month of May), but come in colors not found in that or any other class of Tulips. Their rich and unusual blendings of purple and old gold, bronze and terra-cotta, brown and violet, buff and maroon, are most attractive. These so-called "art shades" put Breeders in a class by themselves. Enormous, graceful, showy blooms, many of them sweet-scented. All are splendid for cutting and should be included in every garden display. They begin to flower when the Giant Triumph Tulips are going off. Heights given for each variety are average; they may vary in different localities and seasons.

Cottage or May Flowering Tulips

Dido
3 for 30¢;
12 for 95¢;
100 for \$7.00.

Cottage or May Flowering Tulips are, perhaps, the most permanent of all Tulips, blooming in early May after the Giant Triumphs have passed, hence the name, "May Flowering." The term "Cottage" is of recent origin, and so called because so many were planted around the country homes and cottages of England. As a class, they are rich in the more delicate and artistic shades of yellow, orange, fawn, salmon, old rose—colors missing to a great extent in other late Tulips. Planting directions are printed on every bag.

Cottage Tulips are as varied in their range of colorings as the Darwins but different in form, being mostly long and oval-shaped, many with gracefully reflexed petals. Stems are long and not so stiff as the Darwins or Breeders. Excellent for cutting and unsurpassed for garden decoration and especially for grouping among shrubbery. Except for a few varieties, they are not recommended for growing indoors.

Heights given with each variety are average and may change somewhat according to locality and season.

Narcissus or Daffodils

In a general way, Daffodil and Narcissus mean the same thing; Daffodil is the common name and Narcissus, the botanical name. Common usage among garden makers in this country has applied the term Daffodil to the giant trumpet varieties, while the smaller or medium trumpet, as well as the Cluster-flowered and Poet's types, are referred to as Narcissus. Botanically these smaller or medium trumpet Daffodils are the Barrii, Incomparabilis, Leedsii, Poeticus, Poetaz, Polyanthus and Miniature types. To avoid confusion, we are listing all of these classes as Daffodils.

Some gardeners apply the name Jonquil to the giant trumpet Daffodils, but this is misleading, as Jonquils are small flowered, sweet scented, have foliage of about the same thickness as width (rush-leaved), while all other Daffodils have flat or grass-like leaves. We are offering Jonquils and their hybrids as such and not as Daffodils.

We are listing the different classes separately, describing the distinguishing characters of each, and in so doing hope it will be of some help to you in selecting the varieties you want in your garden. Plant as many as you can.

As Daffodils bloom early, last a long time, and may be had in so many lovely varied forms, they have few equals as garden flowers. They are most desirable for any garden purpose—in masses, in beds or borders, in groups of 12 or more here and there in the hardy perennial border, or in the foreground of shrubbery. For naturalizing in large quantities, no other flower is more suitable. Daffodils are also ideal, easily grown subjects for winter blooming in the house.

Giant Yellow Trumpet Daffodils

Flowers of the ever-popular Giant or, perhaps better named, Long Trumpet Daffodils, have trumpets as long as, or longer than, the length of the perianth petals. The flowers are freely borne on strong, stiff stems, 1 ft. or more high.

We offer below those varieties which have yellow, lemon or sulphur-colored trumpets and perianths of the same shade or lighter, but not white. *The trumpet is the funnel-like center, the perianth the surrounding row of petals.*

9402 Aerolite (Shown in color on third cover.) Broad, flat, deep primrose perianth petals; pure rich yellow trumpet. Extra large, graceful flowers which are long lasting. 20¢ each; 3 for 55¢; 12 for \$2.00; 100 for \$14.00.

Special Advertising Offer repeated here so that old friends as well as new may take advantage of this bargain. The low prices quoted should encourage you to plant as many bulbs as possible. Ideal for cutting. This is a choice assortment of Giant Trumpet Daffodils in mixture. Recommended for planting in beds, borders, rock garden or as edgings. How to Grow Daffodils

Outdoors: For best results plant bulbs as early in the fall as possible, 4 to 8 in. deep and 6 to 10 in. apart; the exact distances depend on the size of the bulb and the nature of the soil. In very cold locations, after the ground is frozen hard, cover with leaves, straw or coarse litter to a depth of 4 to 6 in.

Indoors: Put several bulbs, about 1 in. apart (same variety), in a pot, barely cover the bulbs with soil, water thoroughly, and put in a cold-frame or heel-in in the garden for 8 to 10 weeks to force root development before bringing indoors for winter blooming.

Medium Trumpet Daffodils

On this and the next page we offer a choice assortment of Daffodils whose trumpets are not so long as the perianth segments. In this group, where the trumpet is greatly reduced in size and cupped, we refer to it as a "cup"; where trumpet is shortened but expanded or broadened, we call it a "crown."

The Medium Trumpet class is divided into three groups —Incomparabilis, Leedsii and Barrii. These divisions are based mainly on the relation of the perianth to the trumpet, crown or cup; an explanation is given under each group.

Barrii Daffodils

In this group, the cup or crown measures less than one-third the length of the perianth segments. For this reason they are often referred to as "Short-cupped Daffodils." They include varieties with yellow perianth and yellow cup, with or without red coloring on the cup, as well as varieties with white or whitish perianth and self-yellow, red-stained, or red cup. The most brilliant red crowned or cupped varieties will be found in the Barrii group.

Poeticus Daffodils are splendid in the open border or naturalized. If the plantings are divided so that some will be in a sunny location, others in semi-shade, and some in heavy shade, the flowering period will extend over several weeks.

Poetaz Daffodils are splendid for garden planting in beds, borders, edgings, groups or naturalizing; also easily forced indoors during the winter. Jonquils and Campernelles

Jonquils and their hybrids have a grace and charm that make them extremely popular. They are a distinctive type of Narcissus, the flowers being small, delightfully scented, and usually borne in clusters of two or more on strong stems. Foliage is erect and rush-like, being about the same thickness as width; other Daffodils have flat or grass-like leaves. They are perfectly hardy in the garden and highly recommended for beds, borders, naturalizing in woodlands, rock gardens, etc.; valuable for indoor culture in pots. Ideal for cutting, as the little flowers are of the greatest substance, keeping in perfect condition for a long time. Some gardeners apply the name "Jonquil" to the large trumpet Daffodils, but this is misleading. They are entirely distinct.

9479 Single Jonquil (Shown in color on third cover.) The true, delightfully scented Jonquil with the fragrance of the honey locust. 3 to 8 rich golden flowers to a stem. A gem for any garden; invaluable for cutting. 3 for 25¢; 12 for 85¢; 100 for \$6.00.

9565 Tullus Hostilius New type of Jonquil hybrid; flowers as large as some of the smaller sized trumpet Daffodils. Of the Jonquil-yellow trumpet type, with usually three flowers to a stem which are produced in the greatest profusion. They are perfect in every respect. An ideal variety for garden display, house culture or cut-flower use. 18¢ each; 3 for 45¢; 12 for \$1.50; 100 for \$10.50.

9483 Golden Sceptre One of the finest of the new Jonquil hybrids. Flowers are deep Jonquil-yellow, 3 in. or so across. The perianth is star-shaped, just a shade lighter in color than the trumpet, which is slightly rolled and flaring at the brim. Ideal for garden and cutting. 3 for 30¢; 12 for 90¢; 100 for \$6.75.

9468 Giganteus Campernelle The largest flowering of all Campernelles. The deep yellow, fragrant flowers are borne freely in clusters of impressive size. Early blooming and a favorite for all purposes. Long keeping qualities. 3 for 35¢; 12 for \$1.15; 100 for \$8.00.

9469 Orange Queen Campernelle Very striking, intense golden orange flowers with prettily fluted cup; 2 or 3 fragrant blooms are borne to a stem. 3 for 30¢; 12 for \$1.00; 100 for \$7.50.

9482 Double Campernelle A very charming variety, bearing, on tall, graceful stems, 2 or more double, deep yellow flowers of great substance; last long in the garden or when cut. 3 for 30¢; 12 for 95¢; 100 for \$7.00.

Double and Semi-double Daffodils

Quite showy flowers, double or semi-double; some are made up of rows of petals of alternate colors, while others have large petals of one color interspersed with shorter petals of another color. The different forms are most attractive.

9449 Argent Attractive, semi-double, star-shaped blooms with alternate rows of long, creamy white and short yolk-yellow petals. Upright grower; strong stemmed. 3 for 30¢; 12 for 90¢; 100 for \$6.50.

Polyanthus Narcissus

The popular flower for growing in the house during the winter and early spring, either in soil or in pebbles and water

One of the easiest flowers to grow. Best results are obtained if your first plantings are not made until after October 15. To have a continuous display, make successive plantings two or three weeks apart. We suggest you order enough bulbs early, as they will keep in perfect condition if put in a cool, dry cellar or spare room until needed for planting.

Water Culture: Put an inch or two of sand or pebbles in bottom of dish; set the bulbs upright and place sufficient pebbles around them to hold them in place. Fill dish with water and set in a dark, cool room until plenty of roots have formed, after which bring to a light but cool, free from frost, place.

Polyanthus Narcissus may also be grown in soil. **They are not suited to garden planting** except in frostless localities.

9460 Paper White Grandiflora

Fall is the best time to plant Hardy Lily Bulbs. They are usually ready in late November or early December. If you live in a locality where the soil freezes up early, prepare your bed, cover with manure, leaves or straw to prevent freezing until bulbs arrive, and then plant promptly. After planting the bulbs, do not put back the manure, etc., until the ground has frozen. Lily bulbs differ greatly in size according to variety; when planting, a safe rule to follow is to cover the bulbs to a depth of three times their diameter. We do not recommend Hardy Lily bulbs for house culture.

Easter Lilies

Popular throughout the world, loved and admired by everyone. We offer three varieties that are ideal for indoor growing—Harrisii, Longiflorum giganteum, and Erabu. Use a 5- or 6-in. pot; place bulb loosely in rich, porous soil so that it is barely covered and the soil gently but firmly set. Keep in a cool, dark but airy place, free from frost, until bulbs are well rooted; afterward bring to the light and grow on in a temperature of not more than 60°. Ideal garden subjects in frost-free locations.

8614 Erabu (Japanese Easter Lily)

Improved type of the well-known Liliun Formosum, with uniform dark-colored stems. Often called "Black-stemmed Formosum." Plants are of healthy, strong growth, about 3 ft. high, and bear their magnificent flowers in whorls at the top of the strong stems. Flowers are large, trumpet-shaped, 6 to 8 in. long, pure waxy white and sometimes tinged with green near the base; the anthers are yellow, which adds to the beauty of the blooms.

Erabu Lily is largely grown for Easter forcing, having practically replaced the old Formosum. They are delightfully fragrant, and if cut when partially open, can be kept for two weeks. Gets its name because nearly all of the bulbs are grown in the Erabu Isles. Usually ready in October.

30¢ each; 3 for 80¢; 12 for \$2.75; 100 for \$20.00.

Bermuda Easter Lily

(Lilium Harrisii)

Quick to come into bloom; may be forced for Christmas, but it is for Easter that it is so extensively planted. The plants grow about 3 ft. tall and produce 5 to 12 or more large, trumpet-shaped, fragrant, waxy white blooms with contrasting yellow anthers. Generally ready for delivery from August to December.

8602 LARGE BULBS: As a rule, they produce 5 to 10 large flowers per plant.

Extra large: 50¢ each; 3 for \$1.40.

Giant Easter Lily

30¢ each; 3 for 85¢; 12 for \$2.75.

8612 Giant Easter Lily

(Lilium longiflorum giganteum)

The flowers are of the purest white and the largest of all Easter Lilies. The plant is of sturdy, stocky growth and largely forced for Easter, but is just as valuable for later flowering. We handle the "Northern or Saitama grown" bulbs, as we consider them the best. Usually ready for shipment in November.

30¢ each; 3 for 85¢; 12 for \$2.75; 100 for \$20.00.

The bulbs offered on this and the previous page are not hardy, so must be grown indoors except in frost-free locations. With the exception of a few varieties of Lilies, all bulbs listed in this book are American grown.

Pansies, English Daisies and Forget-me-nots

For early spring display, the three popular flowers grown from seed are Pansies, English Daisies and Forget-me-nots. These are often referred to as "cool-weather plants" because they produce their largest and most colorful blooms during the cooler seasons of the year—particularly in the early spring. Sow seeds in July or August, early enough so that the seedlings, transplanted in the fall, will reach an almost ready-to-bloom stage before winter sets in. Carry the plants over winter in frames or outdoors, depending on the locality in which you live.

Burpee's Giant Flowered Sweet Peas for Fall Sowing

Sweet Pea seeds sown in the fall bloom earlier and more freely than if sown in the spring. Sow the seed as late in the fall as possible so that it may just germinate previous to frost, thereafter lying dormant all winter, ready to begin growth the first mild days of spring. In this locality (Philadelphia) sow in November and early December; further north, the middle of October, and in the south sow in late September and early October. An ounce will sow about 25 ft. of row.

Early Flowering

Come into bloom 3 to 4 weeks earlier than the Giant Spencer varieties. Especially valuable for growing in frost-free sections and for earliest flowers outdoors in the north; also valuable for winter flowering under glass, for which purpose they are grown by florists in large quantities.

33F35 Aurora Brilliant and luminous orange-scarlet markings on a white ground. Unusual coloring.

33F49 Burpee's Giant Pink Lovely shade of pink blending with a pure soft rose into a marvelous clear rose-pink; most intense towards the edges. Large flowers, long stems.

Burpee's Annual Flower Seeds for Fall Sowing

Many annuals produce earlier and better blooms if seed is sown outdoors in late fall after the first light frosts. Our tests prove early November, in the locality of Philadelphia, is the best time. Seed sown then will lay dormant in the soil until spring, when it will germinate and begin growing long before you could sow outdoors at that time of the year. We have selected the varieties best adapted for fall sowing, which must not be done too early.

Perennial Flower Seeds

Perennial Flowers are the hardy, permanent ones that live for years. In frost-free sections, seeds may be sown at almost any time of the year; in mild climates or in localities where winters are not too severe, seeds may be sown in the fall—the earlier the better—so that plants will be of good size before freezing weather sets in. After the ground is frozen hard, cover the bed with a light mulch of straw or strawy manure to prevent the plants from being heaved out by alternate freezings and thawings. Cultural directions are given on every bag. The Burpee leaflet, "Perennials from Seed," sent **Free** upon request.
